

Foreign National Student Acknowledgement Form

The Professional Massage Therapy Program **does not meet the requirements for practical training** after you complete your studies. You will receive practical training during our Clinical Internship. The Clinical Internship course is designed to represent the professional job market. Through this course students learn customer service, promptness, efficient use of time, and perfecting a 50-minute session of bodywork. These skills help ensure graduate success in the bodywork industry. Students have the opportunity to practice acquired skills and gain valuable experience by working on clients from the general public in the clinical internship. Students work one 5.5-hour shift and complete 4-5 massages per weekend.

Because you are not allowed to work in the United States while here on an I-20 M/N visa, and our program does not qualify for practical training, **the Utah College of Massage Therapy will not be able to assist foreign national students with placement of jobs within the United States.** Our Career Services Department will assist you as much as possible with resources to help you find a job, upon graduation, within your country of residence.

By signing this form, you are acknowledging you understand that due to visa limitations, you are not allowed to work in the United States and that our Career Services Department is unable to assist foreign national students with placement of jobs within the United States.
